

I was watching the clock,
As is ticked and toked,
Just waiting until quarantine would finally stop, I'm
tired of this virus
And I'm tired of masks,
I'm tired of sanitizing after every class,
We need to stop the spread, we all need to be
safe, Unless we want to do this almost everyday
It's not a joke it's just reality
It's the result of human fatality,
We need to help are elders by staying home,
But don't forget police brutality
We're all sisters and brothers
We need to ignore the colors,
Because the world just needs peace,
And equality toward others
